

Consano Bio to Present Clinical Development of C-1101 for Chronic Sciatica at 2026 BIO International Convention

The company recently announced initiation of a Phase 1 trial for C-1101, a potential first-in-class, non-opioid therapy for chronic sciatica

BURLINGTON, MA — June 10, 2026 — [Consano Bio](#), a clinical-stage biotechnology company advancing novel therapeutics designed to address serious pain conditions, today announced that Andrew Hall, Chief Executive Officer will present at BIO International Convention, being held June 22-25, 2026, in San Diego, California.

Presentation Details:

Event:	2026 BIO International Convention
Date and Time:	Monday, June 22 3:30 PM Theater 1
Location:	San Diego Convention Center
Presenter:	Andrew Hall, Chief Executive Officer

During the conference, Mr. Hall will conduct one-on-one meetings with registered investors and potential partners, showcasing the company's business and clinical development strategy and anticipated milestones.

The company recently initiated Phase 1 clinical trial of C-1101 ([C-1101-101, NCT07264270](#)) in patients with painful lumbosacral radiculopathy (LSR), also known as chronic sciatica. C-1101 is a platelet-derived, multi-protein therapeutic designed to be delivered locally to the site of nerve injury. By targeting the inflammatory and biological processes that contribute to persistent nerve damage, Consano aims to develop a disease-modifying approach that addresses the root causes of chronic sciatica rather than masking symptoms.

About Consano Bio

Consano Bio is a clinical-stage biotechnology company dedicated to transforming the treatment of painful and debilitating orthopedic conditions through a new class of multi-protein biologic therapeutics. Founded in 2023 and headquartered in the Greater Boston area. For more information, visit www.consanobio.com.
